Double Carport at Biggera Waters

We believe in attention to detail. We recently built a brand new double carport for our client at Biggera Waters and the results are the perfect example of how a Carport by Scally can improve a home.

Spanning the width of the property, the new structure includes a rendered brick fence, double carport, pedestrian gate entry and an additional yard access gate.

Adhering to a well-thought-out colour scheme, we built the new Carport structure with privacy and practicality in mind – providing plenty of room for vehicles, plenty of privacy and genuine versatility with 3-access points.
