Palm Springs Inspired Patio and Deck

A superb design matched with high attention to detail build always results in a picture-perfect project for our clients.

We recently built a brand new Patio and Deck for our client in Burleigh Waters and the results are excellent. Staying true to their selected Palm Springs inspired style - we built a high gable roof patio that creates a very large, open and protected outdoor entertaining area. We built the patio as a fly-over structure, meaning minimal impact on the existing home and optimal use of the space.

Using whites and finished timber, the project looks perfect when paired with the neat cacti and succulent garden adjacent to the patio.
