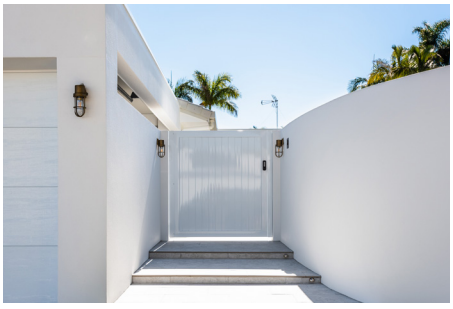
Carport and Entry at Mermaid Waters



First impressions count – and this newly completed carport and entry at Mermaid Waters really sets the bar high.

Using a Palm Springs-inspired style, we recently built a rendered double carport, fence and entry for our client and the results are spectacular.

Paired with a smooth, curved rendered brick fence, the newly appointed Carport structure has added function and style to the home – as well as value. We used premium materials, maritime-style light fittings and finishing options that matched the rest of the home, including the new fly-over patio we also built at the entry of the property.
